

The background features a dark sky filled with numerous small, glowing orange lanterns. A network of white lines connects several larger, prominent lanterns, creating a web-like structure. The overall color palette is dominated by warm orange and yellow tones against a black background.

# ALIGHT

ALLIANCE TO LEAD IMPACT IN  
GLOBAL HUMAN TRAFFICKING

## ABOUT ALIGHT

ALIGHT strives to create a world where anti-trafficking professionals have the resources to achieve justice and restitution for victims and survivors of human trafficking. We work at the intersection of law, technology and human trafficking to offer tools that enable advocates and legal providers to connect across borders, empower trafficking survivors and build meaningful solutions together. Learn more at [alightnet.org](http://alightnet.org)

Our work would not be possible without the 4Bells mobile app created by Caravan Studios (a division of TechSoup Global), which works with communities to develop tools that help them organize, access and use local resources to address pressing problems. Find out more at [caravanstudios.org](http://caravanstudios.org)

**ALIGHT**  
ALLIANCE TO LEAD IMPACT IN  
GLOBAL HUMAN TRAFFICKING

**The ALIGHT Legal  
Needs Matching Pilot  
(with 4Bells app)**

## Human trafficking is a complex and costly assault on the lives of those affected.

Survivors of trafficking struggle to overcome legal impediments that stand in the way of recovery and justice. With diverse legal needs, high levels of vulnerability and difficulty accessing critical resources, these populations are in a uniquely challenging position. ALIGHT works to facilitate connections and collaboration between service providers, advocates and the legal community through the use of pioneering mobile technology to deliver justice and support for human trafficking survivors.

### About the Pilot

For the first time, we have the opportunity to use real-time, mobile technology that can match diverse legal needs of survivors posted by service providers and advocates to relevant and available legal expertise. There will be three phases:

- **PREP:** recruit and review participants, distribute training materials including User Guide and Guidelines, set-up and orientation
- **PILOT:** field use of the 4Bells app for 3 months by participants, with monitoring and support
- **POST:** collect and analyze feedback, and determine strategic next steps for extending technology use

### About the App

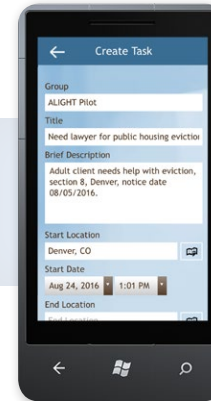

#### What It Offers

- **RELEVANT** legal support for meeting diverse survivor needs
- **REAL-TIME** connections through smart technology that sorts and matches
- **FREE and DIRECT** access to under-utilized legal resources
- **USER-FRIENDLY**, convenient and familiar mobile app platform

## Matching Need to Expertise

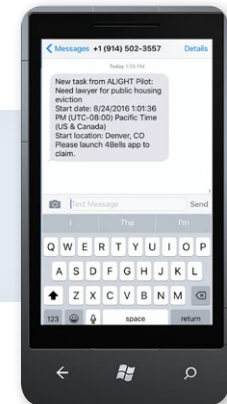

Need: Service providers and advocates who work directly with human trafficking survivors and have a need for legal expertise.

Expertise: Lawyers with expertise in different areas of law who are matched to need based on their availability and skills.

Need requests assistance on behalf of survivor

Expertise in relevant legal area immediately alerted of request

Need connects to Expertise on request
